Subject: [Non-DoD Source] Followup to 5/24 Mtg - plots, process, etc.

Dear Pat,

Thank you again for the very helpful meeting 5/24. We learned a great deal and appreciate the thorough review process you are going through for each survey unit. In case it is helpful, attached is a plot of Cs-137 for SU-99 in Parcel G that we talked about. One thing we were wondering is what does "RAS" mean?

We want to review your work as efficiently as possible to avoid unnecessary delay, especially as various team members may start leaving on vacations during this time of year. I talked with my team this morning to propose a process for us to begin reviewing survey units as soon as we get some batches of forms from your team. It would help to get any conclusions about individual survey along the way, even if you are not ready with the complete forms yet. Also, we'd like to get time series plots of all the RoC's on any survey unit that you do not plan to sample.

I'll be sending a written review of the process that you proposed 5/24 that expresses appreciation for the thorough review process you demonstrated and that makes minor recommendations for formats for presentation of your box plots to facilitate efficiency in your and our reviews (e.g. use consistent scales, show them next to one another).

Again, thank you for the extensive review you are committing to for all survey units, for explaining your process and giving examples, and for sharing information generated along the way. We will work diligently to do our reviews as quickly as we can following receipt of your results along the way.

Lily Lee
